PROFESSIONAL SUMMARY

Frontend-focused Full Stack Engineer with over 4 years of experience in HR Tech and FinTech, specializing in React.js, Next.js, TypeScript, and Node.js. Delivered 100+ production-ready features across enterprise assessment platforms and regional-scale banking systems, and has led delivery end to end as both Project Manager and engineer. Applies AI-augmented development workflows (Claude Code, Antigravity) to accelerate the SDLC.

WORK EXPERIENCE

Front End Developer

Daya Dimensi Indonesia (HR Tech) | Jakarta, Indonesia | Full-time | Feb 2022 - Present

- Delivered 80+ production-ready features for industry-leading HR, assessment, and learning platforms including EnGauge, Learning Hub, DASH SaaS, WISH, ACELENTS, and PortrAI.
- Engineered complex, high-impact systems involving AI-driven assessments, facial recognition technology, and real-time communication modules.

Reduced UI latency by approximately 50% through rigorous code optimization, significantly improving responsiveness and overall user experience across the product suite.

Project Manager & Full Stack Engineer

80&Company / OCT-PATH (Pharmaceutical) | Remote | Freelance, concurrent | Nov 2025 - Aug 2026

- Lead end-to-end product delivery as both Project Manager and Full Stack Engineer, balancing business objectives with technical execution requirements.
- Architected and orchestrated multiple parallel workstreams to ensure on-time delivery of multi-layered digital products.
- Engineered specialized features including assessment engines, secure authentication systems, and automated PDF generation tools.
- Implemented scalable frontend and backend architectures and managed DevOps processes including CI/CD setup and deployment.
- Integrated AI-augmented development workflows using Claude Code to accelerate development cycles.

Senior Front End Developer

IDE Asia (FinTech) | Jakarta, Indonesia | Contract, concurrent | Sep 2024 - Aug 2025

- Re-engaged in a Senior capacity following a successful initial contract term as a Junior Developer.
- Integrated Vietnam eTax Payment systems, ensuring strict compliance with regional financial regulations and security standards.
- Collaborated with international consulting teams from Deloitte to align technical implementations with global business requirements.

Front End Developer

IDE Asia (FinTech) | Jakarta, Indonesia | Contract | Oct 2021 - May 2022

- Architected core UI features for regional-scale banking systems, including BI-FAST interbank transaction flows.
- Delivered 20+ high-quality features aimed at enhancing customer experience (CX) for retail banking platforms.
